6.3mm XLR-Jack adapter to connect it to an amplified audio system with unbalanced input.

It can be powered via the phantom-XLR cable or with two AA batteries

Professional table microphone with **Phantom power and High Sensitivity condenser capsule** that allows you to talk **up to 1 meter away while maintaining excellent quality.**

“Gooseneck” articulated neck, flexible stem, illuminated ring to indicate the status, on/off switch. Optimal for all PA installations such as conferences, announcements, etc. It is powered by two AA batteries **or through the 48V Phantom cable if connected to a mixer.**

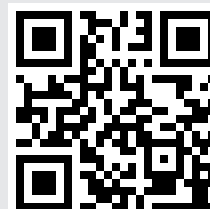

**Included is a 9 meter Phantom-XLR cable and a 6.3mm XLR-Jack adapter:** thanks to this solution it can be used together with an audio mixer or directly to an amplified system with an unbalanced microphone input. It is equipped with an Anti-Pop filter to protect the capsule.

- Capsule type: Condenser
- Polar Pattern: Cardioid
- Output impedance: 75ohm
- Frequency response: 30Hz-18KHz
- Sensitivity: -40dB +/- 2dB
- Operazione Voltage: 2 Batteries AA size / Phantom 48V
